

CONSENT FORM FOR FACIAL EXPRESSION VIDEO DATA COLLECTION

Research use, publication of identifiable material, and data sharing

Study title	Facial Expression Video Data Collection for Human Behaviour Understanding, Modelling and Generation
Research group	Intelligent Behavior Understanding Group, Department of Computing, Imperial College London
Lead Researcher	Jingyi Wan, Department of Computing, Imperial College London Email: j.wan@imperial.ac.uk

Important: Please read the approved Participant Information Sheet before completing this form. Your participation is voluntary. Your face may be recognisable in the original recordings, even if your name is removed or a participant code is used. Please make one clear selection for every Yes/No item. Consent must be completed before recording begins. To keep your face private, you only need to complete Section A (Level 1). If you answer No to all items in Sections C and D, no identifiable image or video of you will ever be published or publicly displayed.

A. Required consent to participate and core research use (Level 1 — required)

All items below are required to take part. Please tick each one.

Required confirmation	Tick
1. I confirm that I am aged 18 years or over and have capacity to provide informed consent.	
2. I confirm that I have read and understood the Participant Information Sheet identified above.	
3. I have had enough time to consider the information, ask questions and receive satisfactory answers.	
4. I understand that participation is voluntary and that I may stop taking part without giving a reason and without penalty or disadvantage.	
5. I understand that the session involves recording video of my face while I perform specified expressions, movements or experimental tasks.	
6. I understand that the recordings may reveal my appearance, approximate age, facial behaviour, voice where audio is recorded, and incidental information about my surroundings.	
7. I understand the foreseeable risks and discomforts described in the Participant Information Sheet.	
8. I understand who will have access to my data, how it will be stored and protected, where it may be processed, and how long it will be retained.	
9. I understand that authorised Imperial College London personnel, research governance staff or regulators may inspect relevant study records where necessary and subject to confidentiality obligations.	
10. I agree to take part in this study.	
11. I agree that authorised members of the research team may view, annotate and analyse my video recordings for this study.	
12. I agree that my recordings may be processed to extract research information such as facial landmarks, facial movements, expression labels, action units, embeddings or other numerical features.	
13. I agree that my recordings and derived data may be used to develop, train, fine-tune, validate, evaluate or compare computational and artificial-intelligence models for human behaviour understanding, facial-expression modelling, video generation, reconstruction, animation, editing and related approved research purposes.	
14. I understand that statistical results, aggregate findings, model-performance results and other outputs that do not directly identify me may be published.	

B. Optional future research and controlled access (additional — not one of the Level 1/2/3 tiers)

These permissions are optional. Please select either Yes or No for every item. You may take part in the current study even if you select No to any or all of these permissions. This section concerns whether other researchers may reuse or access your data for their own research. The distribution of your actual video recordings as a shareable dataset is covered separately in Section D.

Statement / permission	Yes	No
15. I agree that my recordings and derived data may be reused by the Intelligent Behavior Understanding Group for future ethically approved academic research concerning facial expression, human behaviour understanding, computational modelling, video generation, computer vision or related methods, as described in the Participant Information Sheet.		
16. I agree that appropriately authorised Imperial College London researchers outside the immediate research team may access my derived, numerical research data (such as facial landmarks, facial movements, action units and embeddings) for approved, compatible academic research, subject to access controls and confidentiality requirements. (Access to my actual video recordings is covered separately in Section D.)		
17. I agree that approved external academic collaborators may receive or remotely access my derived, numerical research data under a data-sharing agreement and relevant safeguards. (Sharing of my actual video recordings is covered separately in Section D.)		
18. Where applicable, I agree that the recording may include audio for the purposes described in the Participant Information Sheet.		
19. Where applicable, I agree that audio may be analysed or transcribed for the purposes described in the Participant Information Sheet.		

C. Written informed consent for publication and public display (Level 2 — optional)

This section is optional and separate from the required consent in Section A. Please select either Yes or No for every item. Select Yes only for the specific forms of publication or public display you permit.

Restrictions applying unless you separately agree to Level 2 or Level 3: Identifiable images or video of your face will not be included in publicly accessible papers, websites, presentations, teaching materials or demonstrations. The team will use aggregate, numerical, synthetic, blurred, cropped or otherwise modified outputs for public reporting where reasonably possible. Removing your name or using a participant code does not necessarily make a facial image or video anonymous.

Generative and modified outputs: The approved research may generate, reconstruct, animate or edit facial images or videos. Generated outputs may depict expressions, movements or visual changes that were not directly recorded. Where an output remains reasonably identifiable as depicting you, it will be treated as identifiable material and will not be published or publicly displayed unless you separately select the relevant Level 2 permission.

Statement / permission	Yes	No
20. I agree that identifiable still images or selected frames may appear in the main text, figures, tables, Extended Data, appendices or Supplementary Information of an academic journal or conference paper.		
21. I agree that identifiable short video clips may be included as Supplementary Video or other online material associated with an academic journal or conference paper.		
22. I agree that identifiable still images or short video clips may be presented at academic conferences, seminars, workshops or research meetings.		
23. I agree that identifiable still images or short video clips may be used in live or pre-recorded demonstrations of the research system.		
24. I agree that identifiable still images or short video clips may be displayed on official Imperial College London or approved project websites.		

25. I agree that identifiable materials may be included in a publicly accessible preprint before or during journal peer review.		
26. I agree that identifiable examples may be used in teaching or researcher-training materials at Imperial College London.		
27. I agree that approved identifiable material may be published as part of an open-access article or supplementary material under the publication licence applied by the journal.		
28. I agree that approved identifiable material may be used by the journal, publisher or Imperial College London to communicate the published research through official webpages or press materials.		
29. I agree that approved identifiable material may be used on official social-media channels to communicate the published research.		
30. I agree that an approved identifiable still image may be considered for a journal cover or other prominent publication artwork.		
31. I agree that generated, reconstructed, animated or edited images or video that remain identifiable as depicting me may be included in the publication, presentation, website or demonstration uses that I have separately approved above.		

How we may select your approved materials

Statement / permission	Yes	No
32. I give advance permission for the research team to select materials within the Level 2 uses I approved, without contacting me again for each publication.		
33. I require the research team to contact me to approve the specific identifiable image or clip before its first public release.		

Name and identifiability: Your name will not be published with an image or video. A participant code or general non-identifying description may be used. However, your face may still allow people who know you, or facial-analysis systems, to recognise you.

Permanent scientific record: Published articles, supplementary materials, preprints and recordings may remain accessible indefinitely through publisher websites, archives, repositories and indexing services. Public materials may be downloaded, copied, recorded, redistributed or used by third parties beyond Imperial College London's direct control. Complete removal may not be possible after release.

Additional restrictions on Level 2 use (optional). Examples: "still images only", "conference presentations only", "no press materials", "contact me before first publication".

Additional restrictions	
--------------------------------	--

D. Sharing video data with other researchers (Level 3 — optional)

This section is optional and separate from Sections A and C. Please select either Yes or No for every item. Consent to publish selected examples does not permit distribution of your complete recording as a dataset. This section concerns the distribution of your actual video recordings as a dataset. Permissions for other researchers to reuse or access your data for their own research are covered separately in Section B.

Statement / permission	Yes	No
34. I agree that my identifiable video recordings may be made available to verified researchers through a controlled-access process, subject to institutional approval and a data-use agreement.		
35. I agree that modified versions of my recordings - for example with audio removed, background cropped or other direct identifiers removed - may be made available to verified researchers through a controlled-access process.		
36. I agree that my identifiable video recordings may be included in a publicly downloadable research dataset accessible through the internet.		

37. I agree that modified versions of my recordings may be included in a publicly downloadable research dataset accessible through the internet.		
38. I understand that controlled-access or public recipients may be located outside the United Kingdom.		
39. I understand that once a recording has been publicly downloaded, Imperial College London may be unable to control or reverse further copying, redistribution, analysis or attempts to identify individuals.		
Recommended default: Because full facial videos remain identifiable, the research team should normally use controlled access rather than open public release.		

E. Facial identification and biometric processing

To be completed by the research team before use. The statement below describes the approved study.

Statement / permission	Tick
This study analyses facial expression, behaviour or movement and will not use the recordings to recognise, identify or verify who the participant is.	
This study may process facial features for the purpose of recognising, identifying or verifying individuals. The purpose, lawful basis, Article 9 condition where applicable, safeguards and withdrawal implications are specifically explained in the Participant Information Sheet.	

F. Withdrawal and changes to optional permissions

You may withdraw from further participation or withdraw one or more optional permissions by contacting the research contact below. Requests should include your participant ID where available. You understand that:

Research contact	
• withdrawal will not affect your legal rights; • no new use relying on a withdrawn optional permission will begin after the withdrawal has been processed; • data that have been irreversibly anonymised may no longer be identifiable as yours and may be impossible to locate or delete; • withdrawal may not reverse completed analyses, model-development stages, lawful disclosures, published outputs or public materials already released with your permission; • material forming part of a permanent scientific record may not be removable from all copies, archives or third-party downloads; • handling of data incorporated into a trained model, including whether deletion, retraining or another mitigation is technically possible, is described in the Participant Information Sheet.	

G. Data protection and complaints

Imperial College London is responsible for the use of personal data described in the Participant Information Sheet. Questions about the study or handling of personal data should first be directed to the research contact. The Participant Information Sheet should provide details of Imperial College London's Data Protection Officer and the right to raise a concern with the UK Information Commissioner's Office.

H. Participant declaration

Required confirmation	Tick
I confirm that the choices recorded on this form reflect my decisions.	
I understand that Level 2 publication/public display permission is optional and separate from consent to participate and Level 1 research use.	
I understand that Level 3 data-sharing permission is optional and separate from Levels 1 and 2.	
I understand that the detailed Yes/No selections above take precedence over this summary if there is any inconsistency.
